Waste Disposal

Copper-containing soluble wastes can be concentrated through the use of ion exchange, reverse osmosis, or evaporators to the point where copper can be electrolytically removed and sent to a reclaiming firm. If recovery is not feasible, the copper can be precipitated through the use of caustics and the sludge deposited in a chemical waste landfill. Add soda ash to waste CuSO₄ solution; let stand 24 hours. Decant and neutralize solution before flushing to sewer. Landfill sludge.
