SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Avoid breathing mist, gas or vapours. Avoid contacting with skin and eye. Use personal protective equipment. Wear chemical impermeable gloves. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

Environmental precautions

Prevent further spillage or leakage if it is safe to do so. Do not let the chemical enter drains. Discharge into the environment must be avoided.

Methods and materials for containment and cleaning up

Collect and arrange disposal. Keep the chemical in suitable and closed containers for disposal. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment. Adhered or collected material should be promptly disposed of, in accordance with appropriate laws and regulations.

SECTION 7: Handling and storage

Precautions for safe handling

Handling in a well ventilated place. Wear suitable protective clothing. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Use non-sparking tools. Prevent fire caused by electrostatic discharge steam.

Conditions for safe storage, including any incompatibilities

Store the container tightly closed in a dry, cool and well-ventilated place. Store apart from foodstuff containers or incompatible materials.

SECTION 8: Exposure controls/personal protection

Exposure controls

Ensure adequate ventilation. Handle in accordance with good industrial hygiene and safety practice. Set up emergency exits and the risk-elimination area.

Individual protection measures

Eye/face protection

Wear tightly fitting safety goggles with side-shields conforming to EN 166(EU) or NIOSH (US).

Skin protection

Wear fire/flamm resistant and impervious clothing. Handle with gloves. Gloves must be inspected prior to use. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Respiratory protection

If the exposure limits are exceeded, irritation or other symptoms are experienced, use a full-face respirator.

Persistence and degradability

AEROBIC: After 2 weeks of exposure to different bacterial cultures incubated at 25 deg C in both moist and submerged soil, pentachloroaniline did not degrade(1). **ANAEROBIC:** Using a sulfate reducing sediment taken from the Tsurumi river Japan, pentachloroaniline degraded step wise from 2,3,4,5-tetrachloroaniline, 2,3,5-trichloroaniline, 3,5-dichloroaniline, 3-chloroaniline to aniline. Pentachloroaniline degrades through preferential ortho chlorine removal displaying a rate constant of 0.017 day⁻¹ with a half-life of 40 days(2).

Bioaccumulative potential

A BCF of 363(1) and 6026(2) were reported for pentachloroaniline using guppies over a 10 day period in a flow through system and a static system, respectively. According to a classification scheme(3), this range of BCF for pentachloroaniline suggests the potential for bioconcentration in aquatic organisms ranges from high to very high.

Mobility in soil

The Koc of pentachloroaniline is 41,687(1) in soil. According to a classification scheme(2), this Koc value suggests that pentachloroaniline is expected to be immobile in soil. Anilines (aromatic amines) are expected to bind strongly to humus or organic matter in soils(3,4) due to the high reactivity of the aromatic amino group(SRC).

Other adverse effects

no data available

SECTION 13: Disposal considerations

Disposal methods

Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
